

Zang Connect for WebEx

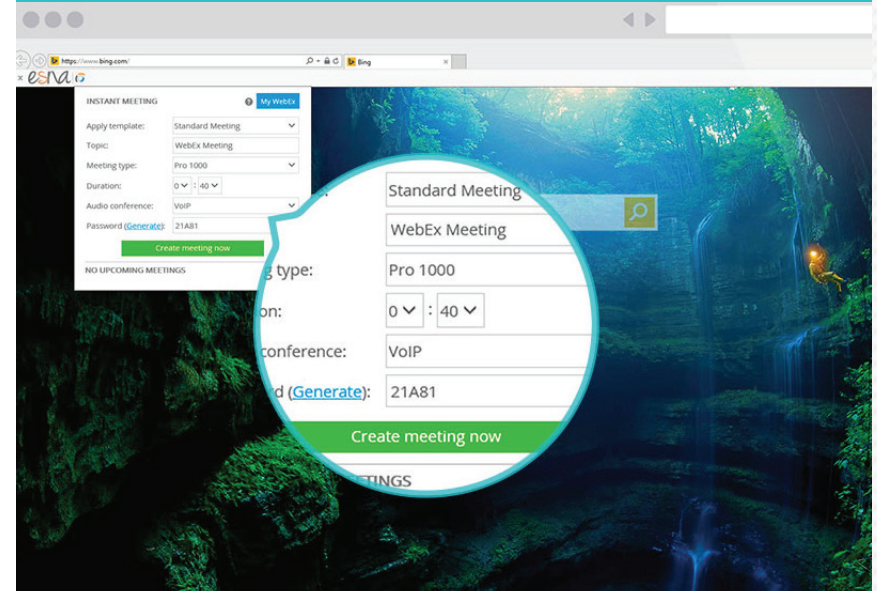

Scheduling WebEx Meetings Has Never Been Easier

Being in such high demand means it's imperative to schedule and manage countless important meetings. Zang Connect for WebEx helps put a little spring in your scheduling step so that meetings are booked expediently and less painfully. The solution is a Google Chrome extension or Internet Explorer Add-on that makes it easy to book WebEx meetings right from whatever Google, Salesforce or Microsoft Office 365 application you're using or Chrome/Internet Explorer Web page you're browsing (i.e. Google Calendar, Google Contact Card, Google People Widget, Office 365 Calendar, Office 365 Hover Card and across Salesforce). Regardless of what you're in the middle of doing, you can get meetings on the calendar—or start, update or eliminate meetings—without having to drop anything.

With Zang Connect for WebEx you can:

- Schedule WebEx meetings just like any other calendar event
- Eliminate the need to book meetings on the main WebEx site
- Update WebEx automatically any time you change your meeting in Google, Salesforce, Microsoft Office 365 or from your smartphone's calendar
- Start an instant WebEx meeting right from any web page or application

Zang Connect for WebEx is a browser extension that makes it easy for you to schedule + start a WebEx meeting instantly with just a few clicks.

Key Features

Google, Salesforce + Microsoft Office 365 Calendar Integration - Schedule + invite contacts to WebEx meetings right from your Google, Salesforce or Office 365 calendar. Zang Connect for WebEx creates your meeting in WebEx and automatically inserts the meeting details into your calendar invite.

- ★ Start + schedule WebEx meetings from within a Google, Office 365 or Salesforce calendar
- ★ Changes made in Google, Salesforce, Office 365 or from your smartphone are automatically updated in WebEx
- ★ Meeting link/information is automatically added to the event description

Log WebEx Meetings in Salesforce - WebEx meetings are automatically logged in Salesforce with a link to the meeting recording under Opportunity, Case, Lead or Contact.

- ★ Easily log WebEx meetings as activities in Salesforce
- ★ WebEx meetings are added to a contact/lead's activity history and can be referenced in reports
