

## Admin Login

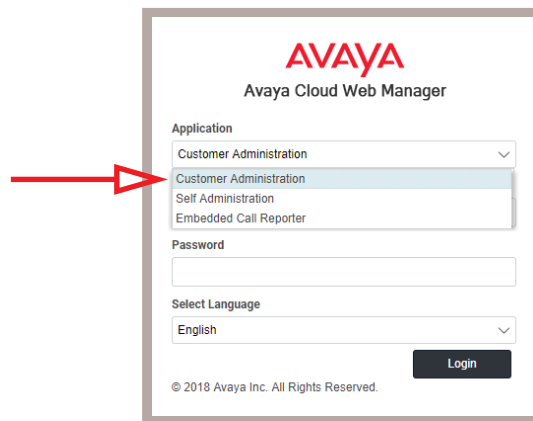

### I WOULD LIKE TO...

Once you have purchased Avaya Cloud and it has been configured, the first thing you need to do as an administrator is login.

Your vendor has provided you with the web site, a username and password.

### LET'S DO IT

- In a web browser, enter the address for the Avaya Cloud site for your company given to you by your vendor.
- On the login screen, under **Application**, select **Customer Administration** from the dropdown menu.

- Enter the administrator's User Name and Password for your company.
- Click the **Login** button.

And there you have it. You are logged in and ready to manage your calls using this console.
