

A Cloud-based, team collaboration tool that brings all of your communication into one place.

zang spaces

Zang Spaces is a cloud-based team collaboration and meeting app. It seamlessly integrates voice, video, tasks, sharing and more into one app you can access anywhere. Use it on your laptop at work, your tablet at home, your phone on-the-go, or even from your space computer in the dark depths of outer space (well, that last one could be an exaggeration).

We designed Zang Spaces for teams that need a simple and effective way to track communications and manage tasks — without being overwhelmed by clutter or chatter. It's a step up from individual task lists, without the jump to large and expensive communication platforms.

- /// **Communicate, Not Distract** - Let everyone work and meet the best way they know how with docs, voice and chat all integrated.
- /// **Collaborate, Don't Juggle** - Tools like document sharing, screen sharing, and meeting scheduling will maximize your productivity without bogging you down with excess features.

- /// **Smart Organization** - When you've outgrown task lists but don't need super complicated task management, use Zang Spaces to organize your communications, coordinate work across teams and track the project progress.
- /// **Be Persistent** - Zang is entirely in the cloud, so all you need is a web browser and an internet connection. Use your personal smartphone, home desktop computer, work laptop or mother-in-law's iPad.
- /// **Safe & Sound**: We're powered by some of the most reputable brands in the data center industry (like Google and Amazon), so you don't need to worry about information security.
